AREAS OF EXPERTISE

Executive project management and development of interior design and exhibition outfitting

Executive project management and development of industrial design products

Concept and communication for interior design and product design

I have obtained my MA in product design at the Venice University Institute of Architecture, where I have developed a solid background in a wide range of subjects such as graphic design, architecture, corporate communication, art history and photography.

While in Venice, I had the valuable opportunity of participating in courses and workshops held by internationally known architects and designers. Among them, I would highlight Tobia Scarpa- the tutor of my thesis whom I still have the privilege to collaborate with- as well as Konstantin Grcic, Marc Sadler, Michele De Lucchi, Alberto Meda, Denis Santachiara, Tomas Maldonado and Guido Guidi.

Since the beginning of my studies, I have realized a number of projects as a free-lance and I have collaborated with different design, architecture, graphic design and photography firms and professionals.

At present I work as a project manager for Merotto Milani, a company producing furniture for interior design and exhibition outfitting on behalf of Italian and international clients such as Benetton Group, Dior, Geox, Biennale di Venezia, and which established important collaborations with distinguished architects such as Tadao Ando Architect & Associates, John Pawson Architect, Matteo Thun and Partners and Lissoni Associati.
